Please check one of the following:

1. I declare that the authors have no competing interests as defined by *Molecular Medicine*, or other interests that might be perceived to influence the results and discussion reported in this paper.

2. The authors have competing interests as defined by *Molecular Medicine*, or other interests that might be perceived to influence the results and discussion reported in this paper.

If you have checked 2, please specify the competing interests:

Signature: \_\_\_\_\_

Name in Block Capitals: \_\_\_\_\_

Date: \_\_\_\_\_

*Molecular Medicine* Definition of Disclosure:

For the purposes of this statement, competing interests are defined as those of a financial nature that, through their potential influence on behavior or content or from perception of such potential influences, could undermine the objectivity, integrity or perceived value of a publication. They can include any of the following:

**Funding:** Research support (including salaries, equipment, supplies, reimbursement for attending symposia, and other expenses) by organizations that may gain or lose financially through this publication.

**Employment:** Recent (while engaged in the research project), present or anticipated employment by any organization that may gain or lose financially through this publication.

**Personal financial interests:** Stocks or shares in companies that may gain or lose financially through publication; consultation fees or other forms of remuneration from organizations that may gain or lose financially; patents or patent applications whose value may be affected by publication.

It is difficult to specify a threshold at which a financial interest becomes significant, but note that many US universities require faculty members to disclose interests exceeding \$10,000 or 5% equity in a company (see, for example, B. Lo *et al. New Engl. J. Med.* **343**, 1616-1620; 2000). Any such figure is necessarily arbitrary, so we offer as one possible practical alternative guideline: "Any undeclared competing financial interests that could embarrass you were they to become publicly known after your work was published."

We do not consider diversified mutual funds or investment trusts to constitute a competing financial interest.
