

Subject Index—Volume 17, 2011

A

- AAT, see α -1-antitrypsin
- AAV, see Antineutrophilic cytoplasmic antibody-associated vasculitis
- ACE, see Angiotensin-converting enzyme
- Activation patterns, brain, regional, assessment of differences in, by functional magnetic resonance imaging, in patients with systemic lupus erythematosus stratified by disease duration, 1349
- Activation, of T and Non-T Cells, gene expression changes in multiple sclerosis relapse suggest, 95
- Activators, small-molecule, of adenosine monophosphate-activated protein kinase, RSVA314 and RSVA405, inhibition of adipogenesis by, 1022
- Activity, kinase, profiling of gram-negative pneumonia by, 741
- Acute cellular rejection, of hepatitis C virus, differentiation of, from recurrence of, by molecular pathways, in hepatitis C virus liver recipients, 824
- Acute central nervous system, injuries to, histone deacetylase inhibitors as therapeutic agents for, 448
- Acute colitis, dextran sodium sulfate-induced, milk fat globule-epidermal growth factor factor 8 as critical protein for healing of, 502
- Acute graft rejection, dynamic expression of Qa-2 during, 248
- Acute intestinal obstruction, identification of histidine decarboxylase as potential biomarker of intestinal mucosal injury in, 1323
- Acute lung inflammation, strain differences in alveolar neutrophil infiltration and macrophage phenotypes in model of, 780
- Acute lung injury, contribution of neutrophils to, 293
- Acute stress, elicited by bungee jumping, suppression of human innate immunity and, 180
- Acute-phase protein α 1-antitrypsin, inhibition of neutrophil calpain 1 and induction of random migration by, 865
- AD, see Alzheimer's disease
- Adenosine monophosphate-activated protein kinase, small-molecule activators of, inhibition of adipogenesis by, 1022
- Adipocyte enhancer-binding protein 1, ablation of, attenuation of atherosclerosis in *apolipoprotein E^{-/-}* and *low-density lipoprotein receptor^{-/-}* mice, 1056
- overexpression of, promotion of atherosclerosis in *apolipoprotein E^{-/-}* and *low-density lipoprotein receptor^{-/-}* mice, 1056
- Adipogenesis, inhibition of, by small-molecule activators of adenosine monophosphate-activated protein kinase, RSVA314 and RSVA405, 1022
- Adipokines, novel, in chronic hepatitis, potential role of adiponectin and leptin and, in chronic hepatitis, 1397
- Adiponectin, in hyperlipidemic rats, concomitant diabetes mellitus and, 36
- leptin and, potential role of novel adipokines visfatin, chemerin, and vaspin and, in chronic hepatitis, 1397
- Adipose expression, liver expression and, of interleukin-1 family members, in morbid obesity, effects of weight loss and, 840
- Adipose tissue, brown, response of, to cold and adrenergic stimulation by induction of fibroblast growth factor-21, 736
- Administration, peripheral, of human adrenomedullin and binding protein of, attenuation of stroke-induced apoptosis and brain injury in rats, 1075
- Adoptive cell therapy, implications of effect of oxygen levels on physiology of dendritic cells for, 910
- Adrenergic stimulation, response of brown adipose tissue to, by induction of fibroblast growth factor-21, 735
- Adrenomedullin, human, and binding protein of, peripheral administration of, attenuation of stroke-induced apoptosis and brain injury in rats, 1075
- AEBP1, see Adipocyte enhancer-binding protein 1
- Age, developmental, influence of, on early transcriptomic response, of children with septic shock, 1146
- AGEs, see Glycation end products
- Aggregate pattern, characterization of, by B-cell subsets in joint compartments of seropositive and seronegative rheumatoid arthritis and no-rheumatoid arthritis arthritides, 901
- Aging, influence of, on cardiac mitochondrial gene expression and cardiovascular function following hemorrhage injury, 542
- AGR, see Acute graft rejection
- AHR, see Aryl hydrocarbon receptor
- AKT, activation of, by overexpression of fatty acid synthase in epithelial ovarian carcinoma, 635
- Akt/Bad, activation of membrane androgen receptors in colon cancer and inhibition of, 48
- Alcohol intoxication, burn injury and, effect of interleukin-18 on neutrophil apoptosis after, 88
- Alcohol-induced liver fibrosis, modulation of, by cannabinoid receptor type 1, 1285
- Aldehyde dehydrogenase 2, inhibition of, by oxidative stress, association of, with cardiac dysfunction in diabetes, 172
- ALDH2, see Aldehyde dehydrogenase 2
- ALI, see Acute lung injury
- Allograft rejection, islet, prevention of, by α -1-antitrypsin gene delivery, 1000
- Allografts, rat islet, role of interleukin-10 induced by CD11b⁺ cells and interleukin-10 activated regulatory T cells in immune modulation of mesenchymal stem cells in, 697
- All-*trans* retinoic acid, upregulation of reduced CD38 transcription in lymphoblastoid cell lines from autism spectrum disorder by, 799
- α -1-antitrypsin gene delivery, reduction of inflammation, increase in T-regulatory cell population size, and prevention of islet allograft rejection by, 1000
- ALR, see Augmenter of liver regeneration
- Alterations, severe, in lipid composition, of frontal cortex lipid rafts from Parkinson's disease and incidental Parkinson's disease, 1107
- Altered methylation, at micro ribonucleic acid-associated CpG islands in hereditary and sporadic carcinomas, methylation-specific multiplex ligation-dependent probe amplification-based approach and, 726
- Alternative splicing fingerprints, diverging, in transforming growth factor- β signaling pathway, identification of, in thoracic aortic aneurysms, 665
- Alveolar neutrophil, infiltration of, strain differences in, macrophage phenotypes and, in acute lung inflammation model, 780
- Alzheimer's disease, impact of calcium channel blockers on, 149
- modulation of cerebrospinal fluid A β levels, in cognitively healthy people at risk for, by P86L polymorphism of calcium homeostasis modulator 1, 974
- AM, see Adrenomedullin
- AMP, see Adenosine monophosphate
- AMPK, see Adenosine monophosphate-activated protein kinase

- Amplification techniques, genome, isolation of torque teno virus 10 by, from patient with concomitant chronic lymphocytic leukemia and polycythemia vera, 1338
- ANCA, see Antineutrophilic cytoplasmic antibody
- Androgen deprivation, in prostate cancer, upregulation of steroidogenic enzymes and stem cell markers during, 657
- Androgen receptors, membrane, activation of, in colon cancer, 48
- Aneurysm, thoracic aortic, advanced study of aortic pathology and, 1365
diverging alternative splicing fingerprints in transforming growth factor- β signaling pathway identified in, 665
- Anger-recall stress, laboratory, in patients with coronary artery disease, autonomic contribution to endothelin-1 increase during, 495
- Angiogenesis, modulation of, by myeloid angiogenic cells, through interleukin-8, 1045
- Angiogenic cells, myeloid, action of, as alternative M2 macrophages, modulation of angiogenesis through interleukin-8 and, 1045
- Angiopoietin-1, protection of heart by, against ischemia/reperfusion injury through vascular endothelial-cadherin phosphorylation and myocardial integrin- β 1/extracellular signal-regulated kinase/caspase-9 phosphorylation cascade, 1095
- Angiotensin-converting enzyme, inhibition, in glomerular injury in diabetic nephropathy, 59
- Angiotensin-converting enzyme 2, overexpression of, glomerular injury and, in diabetic nephropathy, 59
- Angiotensin-II, mediation of activation and expression of nonmuscle myosin II, and contribution to progression of human keloid disease, 1196
- Antibody protection, monoclonal anti-high mobility group box chromosomal protein 1, in experimental arthritis, 1039
- Antibody, monoclonal, superagonistic, for CD 28, amelioration of crescentic glomerulonephritis in Wistar-Kyoto rats by, 686
- Antifibrotic drug evaluation, validation of glaucoma filtration surgical mouse model for, 557
- Anti-high mobility group box chromosomal protein 1, monoclonal, antibody protection by, in experimental arthritis, 1039
- Antihypertensive dihydropyridines, A β accumulation lowered by, 149
targeting of production and clearance of A β across the blood-brain barrier by, 149
- Antimetastatic effects, liver regeneration associated protein in hepatocellular carcinoma and potential of, 221
- Antineutrophilic cytoplasmic antibody-associated vasculitis, with renal manifestations, increase of high-mobility group box 1 in, 29
- Aortic aneurysms, thoracic, diverging alternative splicing fingerprints in transforming growth factor- β signaling pathway identified in, 665
- Aortic pathology, advanced study of, thoracic aortic aneurysm and, 1365
to unravel divergent gene expression profiles in bicuspid and tricuspid aortic valve patients with thoracic aortic dilatation, 1365
- Aortic valve, bicuspid and tricuspid, patients with thoracic aortic dilatation and, advanced study of aortic pathology to unravel divergent gene expression profiles in, 1365
- ApoE^{-/-}*, see *Apolipoprotein E^{-/-}*
- Apolipoprotein E, deficiency, acceleration of progression of atherosclerosis in mice with, by serum amyloid A, 1357
- Apolipoprotein E^{-/-}* mice, attenuation of atherosclerosis in, by ablation of adipocyte enhancer-binding protein 1 in, 1056
promotion of atherosclerosis in, by overexpression of adipocyte enhancer-binding protein 1 in, 1056
- Apolipoprotein E-deficient mice, attenuation of low shear stress-induced atherogenesis in, by inhibition of c-Jun N-terminal kinase, 990
- Apoptosis, cisplatin-induced, potentiation of, by inhibition of fatty acid synthase in epithelial ovarian carcinoma, 635
myocardial, attenuation of endoplasmic reticulum stress-related, by *SERCA2a* gene delivery in ischemic heart disease, 201
neutrophil, effect of interleukin-18 on, after alcohol intoxication and burn injury, 88
stroke-induced, brain injury and, in rats, attenuation of, by peripheral administration of human adrenomedullin and its binding protein, 1057
upregulated modulator of, chemosensitization of intrinsically resistant ovarian cancer cells to cisplatin, by lowering threshold set by Bcl-x_L and Mcl-1 by, 1262
- Arthritides, no-rheumatoid arthritis, B-cell subsets in joint compartments of, expression of memory markers and zeta-associated protein kinase-70 and characterization of aggregate pattern irrespective of autoantibody status and, 901
- Arthritis, experimental, amelioration of joint inflammation and prevention of cartilage and bone destruction by inhibition of histone deacetylase by ITF2357 in, 391
monoclonal anti-high mobility group box chromosomal protein 1 antibody protection in, 1039
rheumatoid and juvenile idiopathic, histone deacetylase inhibition in, 397
rheumatoid, restoring balance of autonomic nervous system as treatment for, 937
seropositive and seronegative, B-cell subsets in joint compartments of, expression of memory markers and zeta-associated protein kinase-70 and characterization of aggregate pattern irrespective of autoantibody status and, 901
- Aryl hydrocarbon receptor, regulation of Wilms tumor suppressor gene genetic programming by, during murine nephrogenesis, 1275
- ASD, see Autism spectrum disorder
- ASPN, see Asporin
- Asporin expression, regulation of, in human chondrocytes, 816
- Asthma, high mobility group protein B1 in, comparison of patients with chronic obstructive pulmonary disease and healthy controls and, 807
- Atherogenesis, low shear stress-induced, in apolipoprotein E-deficient mice, attenuation of, by inhibition of c-Jun N-terminal kinase, 990
- Atherosclerosis, attenuation of, in *apolipoprotein E^{-/-}* and *low-density lipoprotein receptor^{-/-}* mice, by ablation of adipocyte enhancer-binding protein 1 in, 1056
carotid, risk for, increase of, by *BRCA-1 associated protein*, 1065
progression of, accelerated by serum amyloid A, in apolipoprotein E-deficient mice, 1357
promotion of, in *apolipoprotein E^{-/-}* and *low-density lipoprotein receptor^{-/-}* mice, by overexpression of adipocyte enhancer-binding protein 1 in, 1056
- ATRA, see All-trans retinoic acid
- Atrophy, amelioration of, in disuse muscle, by Deptor knockdown, 925

- Augmenter of liver regeneration, antitumorigenic potential of, in hepatocellular carcinoma, 221
- Autism spectrum disorder, upregulation of reduced CD38 transcription in lymphoblastoid cell lines from, by all-*trans* retinoic acid, 799
- Autoantibody status, expression of memory markers and zeta-associated protein kinase-70 and characterization of aggregate pattern irrespective of, by B-cell subsets in joint compartments of seropositive and seronegative rheumatoid arthritis and no-rheumatoid arthritis arthritides, 901
- Autoantibody-induced neutrophil exocytosis, dual role for diacylglycerol kinase-generated phosphatidic acid in, 1242
- Autoimmune diseases, selective immunoglobulin A deficiency in, 1383
use of histone deacetylase inhibitors in treatment of, 333
- Autoinflammatory syndromes, effects of histone deacetylase inhibitor ITF2357 on, 363
- Autonomic contribution to endothelin-1, increase in, during laboratory anger-recall stress in patients with coronary artery disease, 495
- Autonomic nervous system, restoring balance of, as treatment for rheumatoid arthritis, 937
- A β levels of cerebrospinal fluid, modulation of, in cognitively healthy people at risk for Alzheimer's disease, by P86L polymorphism of calcium homeostasis modulator 1, 974
- A β ,
accumulation of, lowered by antihypertensive dihydropyridines, 149
production and clearance of, across the blood-brain barrier, targeting of, by antihypertensive dihydropyridines, 149
- ## B
- B cell receptor, stimulation of intraclonal cell expansion and selection by, in chronic lymphocytic leukemia, 834
- Balance, of autonomic nervous system, restoring, as treatment for rheumatoid arthritis, 937
- BAV, see Bicuspid aortic valve
- BBB, see Blood-brain barrier
- B-cell subsets, in joint compartments of seropositive and seronegative rheumatoid arthritis and no-rheumatoid arthritis arthritides, expression of memory markers and zeta-associated protein kinase-70 and characterization of aggregate pattern irrespective of autoantibody status and, 901
- B-cell, maturation and selection of, differential roles of estrogen receptors α and β in control of, 211
- BCL2L12*, as novel biomarker for prediction of short-term relapse in nasopharyngeal carcinoma, 163
- Bcl-x_L, Mcl-1 and, chemosensitization of intrinsically resistant ovarian cancer cells to cisplatin lowering threshold set by, by p53 upregulated modulator of apoptosis, 1262
- Bicuspid aortic valve, tricuspid and, patients with thoracic aortic dilatation and, advanced study of aortic pathology to unravel divergent gene expression profiles in, 1365
- Binding protein of human adrenomedullin, peripheral administration of, attenuation of stroke-induced apoptosis and brain injury in rats, 1075
- Biomarker, identification of, by proteomic array technology, 70
novel, *BCL2L12* as, for prediction of short-term relapse in nasopharyngeal carcinoma, 163
potential, analysis of modifier genes and, affect of, on clinical course of CLN3 disease, 1253
potential, identification of histidine decarboxylase as, of intestinal mucosal injury in acute intestinal obstruction, 1323
predictive, trimethylation of lysine 27 on histone H3 protein as, of survival and chemoradioresistance in human nasopharyngeal carcinoma, 1137
- Biopsies, prostatic, impact of genotyping on outcome of, 473
- Bladder cancer, muscle invasive, prediction of disease progression in, by four-gene signature, 478
- Blimp-1*, expression of, in T cells following priming by human immunodeficiency virus-1 pulsed dendritic cells, 229
- Blood-brain barrier, production and clearance of A β across, targeting of, by antihypertensive dihydropyridines, 149
- Body fluids, rare cancer cells in, fluorescence-assisted cytological testing as *ex vivo* viral method for enhancing detection of, 628
- Bone destruction, prevention of, by inhibition of histone deacetylase by ITF2357, in experimental arthritis, 391
- Bone marrow stromal cell-derived vascular endothelial growth factor, role of, in apoptotic resistance of cultured chronic lymphocytic leukemia, 619
- Bowel disease, inflammatory, histone deacetylase inhibition in, 426
- Brain activation patterns, regional, assessment of differences in, by functional magnetic resonance imaging, in patients with systemic lupus erythematosus stratified by disease duration, 1349
- Brain injury, stroke-induced apoptosis and, in rats, attenuation of, by peripheral administration of human adrenomedullin and its binding protein, 1057
- BRAP*, see *BRCA-1 associated protein*
- BRCA*, see Breast cancer susceptibility gene *BRCA-1 associated protein*, activation of inflammatory cascades and increase of risk for carotid atherosclerosis by, 1065
- Breast cancer paradigm, transcription factor networks as targets for therapeutic interventions of cancer and, 1133
- Breast cancer susceptibility gene 1-deficient breast cancer cell killing, effective inhibition of poly(ADP-ribose) polymerase by cordycepin and promotion of, 893
- Breast cancer, downregulation of estrogen receptor α signaling in, by let-7 micro ribonucleic acid induction of tamoxifen sensitivity in, 1233
- Brown adipose tissue, response of, to cold and adrenergic stimulation by induction of fibroblast growth factor-21, 736
- Bungee jumping, acute stress elicited by, suppression of human innate immunity and, 180
- Burn injury,
alcohol intoxication and, effect of interleukin-18 on neutrophil apoptosis after, 88
insulin protects against hepatic damage after, 516
- ## C
- C73R/C73R* congenital erythropoietic porphyria, characterization of, 748
- CAD, see Coronary artery disease
- Calcium channel blockers, impact of, on Alzheimer's disease, 149
- Calcium homeostasis modulator 1, P86L polymorphism of, modulation of cerebrospinal fluid A β levels, in cognitively healthy people at risk for Alzheimer's disease by, 974
- CALHM1, see Calcium homeostasis modulator 1
- Calpain-mediated tau cleavage, neurodegeneration, multiple tauopathies and, 677
- Calprotectin, increased levels of, in obesity, relation of, to macrophage content, impact on inflammation and effect of weight loss and, 1157

- Cancer cells,
 ovarian, intrinsically resistant, chemosensitization of, to cisplatin, by lowering threshold set by Bcl-x_L and Mcl-1, by p53 upregulated modulator of apoptosis, 1262
 rare, in body fluids, fluorescence-assisted cytological testing as *ex vivo* viral method for enhancing detection of, 628
- Cancer,
 bladder, muscle invasive, prediction of disease progression in, by four-gene signature, 478
 breast, downregulation of estrogen receptor α signaling in, by let-7 micro ribonucleic acid induction of tamoxifen sensitivity in, 1233
 colon,
 activation of membrane androgen receptors in, 48
 Akt/Bad inhibited by activation of membrane androgen receptors in, 48
 inhibition of growth and metastasis of, by use of lentivirus-mediated ribonucleic acid interference and proteomic analysis to target S100P in, 709
 vinculin/actin signaling blocked by activation of membrane androgen receptors in, 48
 colorectal,
 identification of phospholipid scramblase 1 as biomarker for and prognostic indicator in, 41
 late onset of, correlation of functional variant of IC53 with, 607
 prostate,
 androgen deprivation in, in prostate cancer, upregulation of steroidogenic enzymes and stem cell markers during, 657
 vitamin E and selenium for, 134
 therapeutic interventions of, transcription factor networks as targets for, breast cancer paradigm and, 1133
- Cannabinoid receptor type 1, modulation of alcohol-induced liver fibrosis by, 1285
- Carcinoma,
 epithelial ovarian, Middle Eastern,
 inhibition of fatty acid synthase in, potentiation of cisplatin-induced apoptosis and, 635
 overexpression of fatty acid synthase in, activation of AKT and, 635
- hereditary and sporadic, altered methylation at micro ribonucleic acid-associated CpG islands in, methylation-specific multiplex ligation-dependent probe amplification-based approach and, 726
- hepatocellular,
 antimetastatic potential of liver regeneration associated protein in, 221
 human, expression of trimethylation of lysine 27 on histone 3 in,
 as predictor of worse prognosis, 12
 correlation of vascular invasion with, 12
 human nasopharyngeal, trimethylation of lysine 27 on histone H3 protein as predictive biomarker of survival and chemoradioresistance in, 1137
 nasopharyngeal, *BCL2L12* as novel biomarker for prediction of short-term relapse in, 163
 non-small cell lung, prognostic potential and tumor growth-inhibiting effect of plasma advanced glycation end products in, 980
- Cardiac death, sudden, overexpression of M₃ muscarinic receptor, as novel strategy for preventing, 1179
- Cardiac dysfunction, in diabetes, association of inhibition of aldehyde dehydrogenase 2 by oxidative stress in, 172
- Cardiac mitochondrial gene expression, following hemorrhage injury, influence of aging on, 542
- Cardioprotection,
 against ischemic myocardial damage, effects of small nonerythropoietic helix B surface peptide based on erythropoietin structure on, 194
 loss of, in altered oxido-reductive state in diabetic heart, due to protein disulfide isomerase in, 1012
- Cardiovascular function, following hemorrhage injury, influence of aging on, 542
- Carotid atherosclerosis, risk for, increase of, by *BRCA-1 associated protein*, 1065
- Cartilage destruction, prevention of, by inhibition of histone deacetylase by ITF2357, in experimental arthritis, 391
- Cascades, inflammatory, activation of, by *BRCA-1 associated protein*, 1065
- Caspase-1, hepatoprotective effects of, during trauma and hemorrhagic shock, reduction of liver injury and inflammation by, 1031
- Caveolin-1 expression, by orchidectomy, in nonobese type 2 diabetes animal model, 4
- CCBs, see Calcium channel blockers
- CD 28, superagonistic monoclonal antibody for, amelioration of crescentic glomerulonephritis in Wistar-Kyoto rats by, 686
- CD11b⁺ cells, induction of interleukin-10 by, role of, in immune modulation of mesenchymal stem cells in rat islet allografts, 697
- CD133⁺ glioma stem cells, inhibition of Sonic hedgehog and Notch pathways enhances sensitivity of, to temozolomide therapy, 103
- CD38 transcription, reduced, in lymphoblastoid cell lines from autism spectrum disorder, upregulation of, by all-*trans* retinoic acid, 799
- Cell expansion, intraclonal, intraclonal cell selection and, stimulated by B cell receptor in chronic lymphocytic leukemia, 834
- Cell lines, lymphoblastoid, from autism spectrum disorder, upregulation of reduced CD38 transcription in, by all-*trans* retinoic acid, 799
- Cell selection, intraclonal, intraclonal cell expansion and, stimulated by B cell receptor in chronic lymphocytic leukemia, 834
- Cell therapy, adoptive, implications of effect of oxygen levels on physiology of dendritic cells for, 910
- Cells,
 CD133⁺ glioma stem, inhibition of Sonic hedgehog and Notch pathways enhances sensitivity of, to temozolomide therapy, 103
 dendritic, human immunodeficiency virus-1 pulsed, expression of negative costimulatory molecules and *Blimp-1* in T cells after priming by, 229
 Islet β , protection of, by oral histone deacetylase inhibitor ITF2357 *in vivo* and *in vitro*, 369
 mammal, doubling of total ribonucleic acids against diabetes, ischemia reperfusion and malaria-induced oxidative stress, 533
 mesenchymal stromal, promotion of tumor growth by, through enhancement of neovascularization, 579
 myeloid angiogenic, action of, as alternative M2 macrophages, modulation of angiogenesis through interleukin-8 and, 1045
 suppressor, myeloid derived, role of, in sepsis and trauma, 281
- Cellular rejection, acute, of hepatitis C virus, differentiation of, from recurrence of, by molecular pathways, in hepatitis C virus liver recipients, 824
- Central nervous system, acute injuries to, histone deacetylase inhibitors as therapeutic agents for, 448
- CEP, see Congenital erythropoietic porphyria
- Cerebral malaria, human and experimental, association of sphingosine 1-phosphate with protection in, 717
- Cerebral microvessels, prestroke proteomic

- changes in, stroke-prone, transgenic-hyperlipidemic, Dahl salt-sensitive hypertensive rats, 588
- Cerebrospinal fluid, A β levels of, modulation of, in cognitively healthy people at risk for Alzheimer's disease, by P86L polymorphism of calcium homeostasis modulator 1, 974
- CHC, see Chronic hepatitis C
- Chemerin, novel adipokines visfatin, vaspin and, potential role of adiponectin and leptin and, in chronic hepatitis, 1397
- Chemokine expression, by small sputum macrophages, in chronic obstructive pulmonary disease, 762
- Chemokine, tissue factor-dependent, production of, aggravation of experimental colitis by, 1119
- Chemoradioresistance, in human nasopharyngeal carcinoma, trimethylation of lysine 27 on histone H3 protein as predictive biomarker of, 1137
- Chemosensitization, of intrinsically resistant ovarian cancer cells, to cisplatin, by lowering threshold set by Bcl-x_L and Mcl-1, by p53 upregulated modulator of apoptosis, 1262
- Children, with septic shock, influence of developmental age on early transcriptional response of, 1146
- Chondrocytes, human, regulation of asporin expression in, 816
- Chronic hepatitis C, identification of treatment efficacy-related host factors in, 70
- Chronic inflammatory diseases, use of histone deacetylase inhibitors in treatment of, 333
- Chronic lymphocytic leukemia cell-derived vascular endothelial growth factor, role of, in apoptotic resistance of cultured chronic lymphocytic leukemia, 619
- Chronic lymphocytic leukemia, B cells of, mutation pattern of paired immunoglobulin heavy and light variable domains in, 1188
- concomitant with polycythemia vera, isolation of torque teno virus 10 by genome amplification techniques from patient with, 1338
- cultured, bone marrow stromal cell-derived vascular endothelial growth factor versus chronic lymphocytic leukemia cell-derived vascular endothelial growth factor in apoptotic resistance of, 619
- intraclonal cell expansion and selection driven by B cell receptor in, 834
- intraclonal complexity in, 1374
- proliferative fractions in, in recently born/divided and older/quiescent cells, 1374
- Chronic obstructive pulmonary disease, chemokine expression by small sputum macrophages in, 762
- comparison of patients with, and healthy controls, high mobility group protein B1 in asthma and, 807
- Chronic tumor necrosis factor- α , effect of neutralization of, on insulin resistance in metabolic syndrome in men, 189
- on endothelial function in metabolic syndrome in men, 189
- Circulating damage marker, neuroprotective effect of erythropoietin in ischemic stroke patients with profiles of, 1306
- Cisplatin, chemosensitization of intrinsically resistant ovarian cancer cells to cisplatin, by lowering threshold set by Bcl-x_L and Mcl-1, by p53 upregulated modulator of apoptosis, 1262
- Cisplatin-induced apoptosis, potentiation of, by inhibition of fatty acid synthase in epithelial ovarian carcinoma, 635
- c-Jun N-terminal kinase, inhibition of, attenuation of low shear stress-induced atherogenesis in apolipoprotein E-deficient mice by, 990
- Clearance, of A β , across the blood-brain barrier, targeting of, by antihypertensive dihydropyridines, 149
- Cleavage, calpain-mediated tau, neurodegeneration, multiple tauopathies and, 677
- Clinical course, of CLN3 disease, analysis of affect of potential biomarkers and modifier genes on, 1253
- Clinical practice, current molecular imaging of spinal tumors in, 308
- Clinical relevance, of the complement system, 317
- CLL, see Chronic lymphocytic leukemia
- CLN3 disease, analysis of affect of potential biomarkers and modifier genes on clinical course of, 1253
- CM, see Cerebral malaria
- CNS, see Central nervous system
- Coagulation function, fibrinogen availability and, after hemorrhage and resuscitation in pigs, 757
- Coagulation, disseminated intravascular, thromboelastometry in, in pig model of endotoxemia, 266
- Cold, response of brown adipose tissue to, by induction of fibroblast growth factor-21, 735
- Colitis, dextran sodium sulfate-induced acute, milk fat globule-epidermal growth factor factor 8 as critical protein for healing of, 502
- experimental, aggravation of, by tissue factor-dependent chemokine production, 1119
- murine, trinitrobenzene sulfonic acid-induced acute and chronic, amelioration of, by targeting interleukin-12/interleukin-23 with a p40 peptide-based vaccine, 646
- Colon cancer, activation of membrane androgen receptors in, 48
- Akt/Bad inhibited by activation of membrane androgen receptors in, 48
- inhibition of growth and metastasis of, by use of lentivirus-mediated ribonucleic acid interference and proteomic analysis to target S100P in, 709
- vinculin/actin signaling blocked by activation of membrane androgen receptors in, 48
- Colorectal cancer, identification of phospholipid scramblase 1 as biomarker for and prognostic indicator in, 41
- late onset of, correlation of functional variant of IC53 with, 607
- Comment, on tissue factor-dependent chemokine production aggravates experimental colitis, 1131
- Complement system, structure, function and clinical relevance of, 317
- Complexity, intraclonal, in chronic lymphocytic leukemia, 1374
- Complications, obesity-associated, alleviation of, by galantamine, in high-fat diet-fed mice by, 599
- Composition, lipid, severe alterations in, of frontal cortex lipid rafts from Parkinson's disease and incidental Parkinson's disease, 1107
- Concomitant diabetes mellitus, serum leptin, adiponectin and tumor necrosis factor- α in hyperlipidemic rats with and without, 36
- Congenital erythropoietic porphyria, characterization of murine models of severe common and later-onset genotypes of, 748
- Contractile dysfunction of diaphragm muscle, rescue of, by peptide-based inhibition of nuclear factor- κ B in murine model of Duchenne muscular dystrophy, 508
- COPD, see Chronic obstructive pulmonary disease
- Cordycepin, effective inhibition of poly(ADP-ribose) polymerase by, blocking of lung injury-associated inflammation and promotion of breast cancer susceptibility gene 1-deficient breast cancer cell killing by, 893

- Coronary artery disease, autonomic contribution to endothelin-1 increase during laboratory anger-recall stress in patients with, 495
- Costimulatory molecules, negative, expression of, in T cells following priming by human immunodeficiency virus-1 pulsed dendritic cells, 229
- CpG islands, micro ribonucleic acid-associated, altered methylation, in hereditary and sporadic carcinomas, methylation-specific multiplex ligation-dependent probe amplification-based approach and, 726
- CRC, see Colorectal cancer
- Crescentic glomerulonephritis, in Wistar-Kyoto rats, amelioration of, by a superagonistic monoclonal antibody for CD 28, 686
- CSF, see Cerebrospinal fluid
- CYP1A2*2F alleles, association of, with susceptibility to porphyria cutanea tarda, 241
- Cytochrome P450 genes, association of, with susceptibility to porphyria cutanea tarda, 241
- Cytokine responses, inducible, pharmacokinetics, safety and, during a phase 1 trial of oral histone deacetylase inhibitor ITF2357 (givinostat), 353
- Cytokines, reduction of, by oral histone deacetylase inhibitor ITF2357 *in vivo* and *in vitro*, 369
- Cytological testing, fluorescence-assisted, as *ex vivo* viral method for enhancing detection of rare cancer cells in body fluids, 628
- ## D
- Damage marker, circulating, neuroprotective effect of erythropoietin in ischemic stroke patients with profiles of, 1306
- Damage, hepatic, postburn, insulin as protection against, 516
- ischemic myocardial, cardioprotective effects of small nonerythropoietic helix B surface peptide based on erythropoietin structure on, 194

- Protein disulfide isomerase, in altered

oxido-reductive state in diabetic heart, loss of cardioprotection due to, 1012

Protein synthesis, in myocytes, enhancement of, by Deptor knockdown, 925

Protein α 1-antitrypsin, acute-phase, inhibition of neutrophil calpain 1 and induction of random migration by, 865

Protein, critical, milk fat globule-epidermal growth factor factor 8 as, for healing of dextran sodium sulfate-induced acute colitis, 502

Proteomic analysis, lentivirus-mediated ribonucleic acid interference and, targeting of S100P in colon cancer growth and metastasis by, 709

Proteomic array technology, identification of biomarkers by, 70

Proteomic changes, prestroke, in cerebral microvessels, in stroke-prone, transgenic-hyperlipidemic, Dahl salt-sensitive hypertensive rats, 588

PUMA, see p53 upregulated modulator of apoptosis

PV, see Polycythemia vera

Pyroglutamate helix B surface peptide, small nonerythropoietic, based on erythropoietin structure, cardioprotective effects of, against ischemic myocardial damage, 194

Q

Quality, poorer, among kidneys with delayed graft function, identified by pretransplant transcriptome profiles, 1311

R

RA, see Rheumatoid arthritis

Rafts, lipid, frontal cortex, severe alterations in lipid composition of, from Parkinson's disease and incidental Parkinson's disease, 1107

Rapamycin, amelioration of dystrophic phenotype in *mdx* mouse skeletal muscle by, 917

Rat islet allografts, role of interleukin-10 induced by CD11b⁺ cells and interleukin-10 activated regulatory T cells in immune modulation of mesenchymal stem cells in, 697

Rats,

- diabetic, inhibition of aldehyde dehydrogenase 2 by oxidative stress associated with cardiac dysfunction in, 172
- hyperlipidemic,
 - adiponectin in, 36
 - concomitant diabetes mellitus and, 36
 - serum leptin in, 36
 - tumor necrosis factor- α in, 36
- Wistar-Kyoto, amelioration of crescentic glomerulonephritis by a superagonistic monoclonal antibody for CD 28 in, 686

Receptors,

- estrogen, α and β , differential roles of, in control of B-cell maturation and selection, 211
- membrane androgen, activation of, in colon cancer, 48
- of hepatitis C virus, differentiation of, from acute cellular rejection in, by molecular pathways, in hepatitis C virus liver recipients, 824

Regulation, of target genes, in familial young-onset diabetes, differential effects of hepatocyte nuclear factor 1- α mutations associated with, 256

Rejection,

- acute cellular, of hepatitis C virus, differentiation of, from recurrence of, by molecular pathways, in hepatitis C virus liver recipients, 824
- graft, acute, dynamic expression of Qa-2 during, 248
- islet allograft, prevention of, by α -1-antitrypsin gene delivery, 1000

Relapse,

- multiple sclerosis, gene expression changes in, 95
- short-term, *BCL2L12*, as novel biomarker for prediction of, in nasopharyngeal carcinoma, 163

Relevance, clinical, of the complement system, 317

Remethylation, of folate-dependent methionine synthase-mediated homocysteine, by glycine N-methyltransferase expression, 486

Renal fibrosis,

- implication of endoplasmic reticulum stress in development of, 1295
- protective effect of transient receptor potential vanilloid type 1 against, via inhibition of TGF- β /Smad signaling in deoxycorticosterone acetate-salt hypertension, 1204

Renal manifestations, antineutrophilic cytoplasmic antibody-associated vasculitis, with, increase of high-mobility group box 1 in, 29

Reperfusion, ischemia, doubling of total ribonucleic acids against, by mammal cells, 533

Research, translational, therapeutic perspectives and, in dysferlinopathies, 875

Reservoir, latent, histone deacetylase inhibitors for purging human immunodeficiency virus-1 from, 466

Resistance, insulin,

- effect of neutralization of chronic tumor necrosis factor- α on, in men with metabolic syndrome, 189
- in morbidly obese subjects, association of stearoyl-CoA desaturase-1 with, 273

Response to comment, on tissue factor-dependent chemokine production aggravates experimental colitis, 1132

Responses, inducible cytokine, pharmacokinetics, safety and, during a phase 1 trial of oral histone deacetylase inhibitor ITF2357 (givinostat), 353

Restriction, energy, involvement of leptin receptor long isoform-signal transducer and activator of transcription 3 signaling pathway in downregulation of in brain fat mass- and obesity-associated downregulation during, 523

Resuscitation, hemorrhage and, in pigs, fibrinogen availability and coagulation function after, 757

Retroviral insertional mutagenesis, contribution of, to immortalization of mature T lymphocytes, 1223

Rheumatoid arthritis,

- histone deacetylase inhibition in, 397
- restoring balance of autonomic nervous system as treatment for, 937
- seropositive and seronegative, B-cell subsets in joint compartments of, expression of memory markers and zeta-associated protein kinase-70 and characterization of aggregate pattern irrespective of autoantibody status and, 901

Ribonucleic acid interference, lentivirus-mediated, proteomic analysis and, targeting of S100P in colon cancer growth and metastasis by, 709

Ribonucleic acid-eluting surfaces, small-interfering, as novel concept for intravascular local gene silencing, 1213

Ribonucleic acids, total, doubling of, in mammal cells, against diabetes, ischemia reperfusion and malaria-induced oxidative stress, 533

Risk, for carotid atherosclerosis, increase of, by *BRCA-1 associated protein*, 1065

RNA, see Ribonucleic acid

Roles, differential, of estrogen receptors α and β in control of B-cell maturation and selection, 211

RSVA314, small-molecule activators of, inhibition of adipogenesis by, 1022

RSVA405, small-molecule activators of, inhibition of adipogenesis by, 1022

S

S100P, inhibition of colon cancer growth and metastasis by lentivirus-mediated ribonucleic acid interference and proteomic analysis targeting of, 709

S1P, see Sphingosine 1-phosphate

SAA, see Serum amyloid A

Safety, pharmacokinetics, inducible cy-

- tokine responses and, during a phase 1 trial of oral histone deacetylase inhibitor ITF2357 (givinostat), 353
- Scarring, hypertrophic, keloids and, pathomechanisms and treatment strategies for, 113
- SCD1, see Stearoyl-CoA desaturase-1
- SELECT, see Selenium and Vitamin E Cancer Prevention Trial
- Selection, B-cell, differential roles of estrogen receptors α and β in control of, 211
- Selective immunoglobulin A deficiency, in autoimmune diseases, 1383
- Selenium and Vitamin E Cancer Prevention Trial, status of, 134
- Selenium, vitamin E and, for prostate cancer, 134
- Sensitivity, tamoxifen, induction of, by downregulation of estrogen receptor α signaling in breast cancer, by let-7 micro ribonucleic acid, 1233
- Sepsis, Merinoff Symposium on, 2 milk fat globule-EGF factor VIII in, 126 role of myeloid-derived suppressor cells in, 281
- Septic shock, influence of developmental age on early transcriptomic response, of children with, 1146
- SERCA2a* gene delivery, attenuation of endoplasmic reticulum stress-related myocardial apoptosis in ischemic heart disease by, 201
- Seronegative rheumatoid arthritis, B-cell subsets in joint compartments of, expression of memory markers and zeta-associated protein kinase-70 and characterization of aggregate pattern irrespective of autoantibody status and, 901
- Seropositive rheumatoid arthritis, B-cell subsets in joint compartments of, expression of memory markers and zeta-associated protein kinase-70 and characterization of aggregate pattern irrespective of autoantibody status and, 901
- Serum amyloid A, acceleration of progression of atherosclerosis in apolipoprotein E-deficient mice, 1357
- Serum leptin, in hyperlipidemic rats, concomitant diabetes mellitus and, 36
- SHH, see Sonic hedgehog
- Shock, septic, influence of developmental age on early transcriptomic response, of children with, 1146
- Signal pathways, phosphorylation-based, widespread deregulation of, in multiple myeloma cells, opportunities for therapeutic intervention in, 790
- Signal transducer and activator of transcription 3 signaling pathway, leptin receptor long isoform-, involvement of, in brain fat mass- and obesity-associated downregulation during energy restriction, 523
- Signal transducers and activator of transcription, within mammalian nervous system, 965
- Signaling pathway, leptin receptor long isoform-signal transducer and activator of transcription 3, involvement of, in brain fat mass- and obesity-associated downregulation during energy restriction, 523
- Signaling, estrogen receptor α , in breast cancer, downregulation of, induction of tamoxifen sensitivity by let-7 micro ribonucleic acid, 1233 TGF- β /Smad, inhibition of, in deoxycorticosterone acetate-salt hypertension, protective effect of transient receptor potential vanilloid type 1 against renal fibrosis via, 1204 vinculin/actin, activation of membrane androgen receptors in colon cancer and blocking of, 48
- Signals, prosurvival, activation of membrane androgen receptors in colon cancer and inhibition of, 48
- Signature, four-gene, prediction of disease progression in muscle invasive bladder cancer by, 478
- Silencing, intravascular, local gene, small-interfering ribonucleic acid-eluting surfaces as novel concept for, 1213
- Skeletal muscle, *mdx* mouse, amelioration of dystrophic phenotype in, by rapamycin, 917
- Small-molecule activators of adenosine monophosphate-activated protein kinase, RSVA314 and RSVA405, inhibition of adipogenesis by, 1022
- Sonic hedgehog pathway, sensitivity of CD133⁺ glioma stem cells to temozolomide therapy enhanced by inhibition of, 103
- Sphingosine 1-phosphate, association of, with protection in human and experimental cerebral malaria, 717
- Spinal tumors, current molecular imaging of, in clinical practice, 308
- Splicing fingerprints, diverging alternative, in transforming growth factor- β signaling pathway, identification of, in thoracic aortic aneurysms, 665
- Sputum macrophages, small, chemokine expression by, in chronic obstructive pulmonary disease, 762
- STAT, see Signal transducers and activator of transcription
- STAT3, see Signal transducer and activator of transcription 3
- Stearoyl-CoA desaturase-1, insulin resistance in morbidly obese subjects and, 273
- Stem cell markers, steroidogenic enzymes and, upregulation of, during androgen deprivation in prostate cancer, 657
- Stem cells, CD133⁺ glioma, inhibition of Sonic hedgehog and Notch pathways enhances sensitivity of, to temozolomide therapy, 103 mesenchymal, immune modulation of, in rat islet allografts, role of interleukin-10 induced by CD11b⁺ cells and interleukin-10 activated regulatory T cells in, 697
- Steroidogenic enzymes, stem cell markers and, upregulation of, during androgen deprivation in prostate cancer, 657
- Stimulation, adrenergic, response of brown adipose tissue to, by induction of fibroblast growth factor-21, 735
- Strain differences, in alveolar neutrophil, infiltration of, macrophage phenotypes and, in acute lung inflammation model, 780
- Stress, acute, elicited by bungee jumping, suppression of human innate immunity and, 180 endoplasmic reticulum, implication of, in development of renal fibrosis, 1295 myocardial apoptosis related to, attenuation of, by *SERCA2a* gene delivery, in ischemic heart disease, 201 oxidative, inhibition of aldehyde dehydrogenase 2 by, association of, with cardiac dysfunction in diabetes, 172 malaria-induced, doubling of total ribonucleic acids against, by mammalian cells, 533
- Stroke, ischemic, neuroprotective effect of erythropoietin in patients with, with circulating damage marker profiles, 1306
- Stroke-induced apoptosis, brain injury and, in rats, attenuation of, by peripheral administration of human adrenomedullin and its binding protein, 1057
- Stroke-prone, transgenic hyperlipidemic, Dahl salt-sensitive hypertensive rats, pre-stroke proteomic changes in cerebral microvessels in, 588
- Stromal cells, mesenchymal, promotion of tumor growth by, through enhancement of neovascularization, 579
- Structure, of the complement system, 317
- Suppressor cells, myeloid derived, role of, in sepsis and trauma, 281
- Surface peptide, nonerythropoietic helix B,

- small, based on erythropoietin structure, cardioprotective effects of, against ischemic myocardial damage, 194
- Surgical mouse model, glaucoma filtration, validation of, for antifibrotic drug evaluation, 557
- Survival, in human nasopharyngeal carcinoma, trimethylation of lysine 27 on histone H3 protein as predictive biomarker of, 1137
- Syndromes, autoinflammatory, effects of histone deacetylase inhibitor ITF2357 on, 363
- Synthesis, protein, in myocytes, enhancement of, by Deptor knockdown, 925
- Synthetic lethality, development of, poly(ADP-ribose) polymerase-1 inhibition and, 854
- System, complement, structure, function and clinical relevance of, 317
- Systemic lupus erythematosus, stratified by disease duration, assessment of differences in regional brain activation patterns by functional magnetic resonance imaging in patients with, 1349
- ## T
- T cells,
expression of negative costimulatory molecules and *Blimp-1* in, following priming by human immunodeficiency virus-1 pulsed dendritic cells, 229
gene expression changes in multiple sclerosis relapse suggest activation of, 95
- T lymphocytes, mature, immortalization of, contribution of retroviral insertional mutagenesis to, 1223
- TAA, see Thoracic aortic aneurysm
- Tamoxifen sensitivity, induction of, by downregulation of estrogen receptor α signaling in breast cancer by micro ribonucleic acid, 1233
- Target genes, regulation of, in familial young-onset diabetes, differential effects of hepatocyte nuclear factor 1- α mutations associated with, 256
- Tau cleavage, calpain-mediated, neurodegeneration, multiple tauopathies and, 677
- Tauopathies, multiple, calpain-mediated tau cleavage, neurodegeneration and, 677
- TAV, see Tricuspid aortic valve
- TEM, see Thromboelastometry
- Temozolomide therapy, sensitivity of CD133⁺ glioma stem cells to, enhanced by inhibition of Sonic hedgehog and Notch pathways, 103
- Testing, fluorescence-assisted cytological, as *ex vivo* viral method for enhancing detection of rare cancer cells in body fluids, 628
- TGF β , see transforming growth factor- β
- TGF- β /Smad signaling, inhibition of, in deoxycorticosterone acetate-salt hypertension, protective effect of transient receptor potential vanilloid type 1 against renal fibrosis via, 1204
- Therapeutic intervention, opportunities for, widespread deregulation of phosphorylation-based signaling pathways in multiple myeloma cells and, 790
- Therapeutic perspectives, translational research and, in dysferlinopathies, 875
- Therapeutic potential, of histone deacetylase inhibitors in treatment of multiple sclerosis, 442
- Therapies, multitargeted, novel promising, alteration of frequent gene products and molecular pathways in prostate cancer and metastasis-initiating cells and their progenies and, 949
- Therapy, temozolomide, sensitivity of CD133⁺ glioma stem cells to, enhanced by inhibition of Sonic hedgehog and Notch pathways, 103
- Thoracic aortic aneurysms,
advanced study of aortic pathology and, 1365
diverging alternative splicing fingerprints in transforming growth factor- β signaling pathway identified in, 665
- Thoracic aortic dilatation, advanced study of aortic pathology to unravel divergent gene expression profiles in bicuspid and tricuspid aortic valve patients with, 1365
- Thromboelastometry, in disseminated intravascular coagulation in pig model of endotoxemia, 266
- 3D, see Three-dimensional
- Three-dimensional structure, of erythropoietin, mimicking of, by nonerythropoietic peptide, reduction of organ injury, dysfunction and inflammation in experimental hemorrhagic shock by, 883
- Tissue factor-dependent chemokine production aggravates experimental colitis, comment on, 1131
- Tissue factor-dependent chemokine production aggravates experimental colitis, response to comment on, 1132
- Tissue factor-dependent chemokine production of, aggravation of experimental colitis by, 1119
- TMZ, see Temozolomide
- TNBS, see Trinitrobenzene sulfonic acid
- TNF- α , see Tumor necrosis factor- α
- Torque teno virus 10, isolation of, by genome amplification techniques from patient with concomitant chronic lymphocytic leukemia and polycythemia vera, 1338
- Total ribonucleic acids, doubling of, in mammal cells, against diabetes, ischemia reperfusion and malaria-induced oxidative stress, 533
- Transcription factor networks, as targets for therapeutic intervention of cancer, breast cancer paradigm and, 1133
- Transcriptome profiles, pretransplant, poorer quality and outcome among kidneys with delayed graft function identified by, 1311
- Transcriptomic response, early, influence of developmental age on, of children with septic shock, 1146
- Transforming growth factor- β signaling pathway, identification of diverging alternative splicing fingerprints in, in thoracic aortic aneurysms, 665
- Transgenic hyperlipidemic, Dahl salt-sensitive hypertensive rats, stroke-prone, pre-stroke proteomic changes in cerebral microvessels in, 588
- Transgenic mice, overexpression of M₃ muscarinic receptor, as novel strategy for preventing sudden cardiac death in, 1179
- Transient receptor potential vanilloid type 1, protective effect of, against renal fibrosis via inhibition of TGF- β /Smad signaling in deoxycorticosterone acetate-salt hypertension, 1204
- Translational research, therapeutic perspectives and, in dysferlinopathies, 875
- Trauma,
hemorrhagic shock and, hepatoprotective effects of caspase-1 during, reduction of liver injury and inflammation by, 1031
role of myeloid-derived suppressor cells in, 281
- Treatment strategies, current and emerging, for hypertrophic scarring and keloids, 113
- T-regulatory cell population size, increase in, by α -1-antitrypsin gene delivery, 1000
- Trial, phase 1, of oral histone deacetylase inhibitor ITF2357 (givinostat), pharmacokinetics, safety and inducible cytokine response during, 353
- Tricuspid aortic valve, bicuspid and, patients with thoracic aortic dilatation and, advanced study of aortic pathology to unravel divergent gene expression profiles in, 1365
- Trimethylation of lysine 27,
on histone 3, expression of, in human hepatocellular carcinomas, as predictor of worse prognosis, 12
on histone H3 protein, as promising predictive biomarker of survival and chemoradioresistance in human nasopharyngeal carcinoma, 1137

SUBJECT INDEX

- Trinitrobenzene sulfonic acid-induced murine colitis, acute and chronic, amelioration of, by targeting interleukin-12/interleukin-23 with a p40 peptide-based vaccine, 646
- TRPV1, see Transient receptor potential vanilloid type 1
- TTV, see Torque teno virus
- Tumor growth, promotion of, by mesenchymal stromal cells, through enhancement of neovascularization, 579
- Tumor growth-inhibiting effect, and prognostic potential, of plasma advanced glycation end products in non-small cell lung carcinoma, 980
- Tumor necrosis factor- α ,
chronic,
effect of neutralization of, on insulin resistance in metabolic syndrome in men, 189
effect of neutralization of, on endothelial function in metabolic syndrome in men, 189
in hyperlipidemic rats, concomitant diabetes mellitus and, 36
- Tumors, spinal, current molecular imaging of, in clinical practice, 308

U

- Upregulation, of steroidogenic enzymes and stem cell markers, during androgen deprivation in prostate cancer, 657

V

- Vaccine, p40 peptide-based, targeting interleukin-12/interleukin-23 with, to ameliorate trinitrobenzene sulfonic acid-induced acute and chronic murine colitis, 646
- Vascular endothelial growth factor, bone marrow stromal cell-derived, role of, in apoptotic resistance of cultured chronic lymphocytic leukemia, 619
chronic lymphocytic leukemia cell-derived, role of, in apoptotic resistance of cultured chronic lymphocytic leukemia, 619
- Vascular endothelial-cadherin phosphorylation, protection of the heart against ischemia/reperfusion injury, by angiotensin-1 through, 1095
- Vascular invasion, correlation of, with expression of trimethylation of lysine 27 on histone 3 in human hepatocellular carcinomas, 12
- Vasculitis, antineutrophilic cytoplasmic antibody-associated, with renal manifestations, increase of high-mobility group box 1 in, 29
- Vaspin, novel adipokines chemerin, visfatin

- and, potential role of adiponectin and leptin and, in chronic hepatitis, 1397
- VE, see Vascular endothelial
- VEGF, see Vascular endothelial growth factor
- Vinculin/actin signaling, activation of membrane androgen receptors in colon cancer and blocking of, 48
- Virus, hepatitis C, differentiation of recurrence of, from acute cellular rejection in, by molecular pathways, in hepatitis C virus liver recipients, 824
- Visfatin, novel adipokines chemerin, vaspin and, potential role of adiponectin and leptin and, in chronic hepatitis, 1397
- Vitamin E, selenium and, for prostate cancer, 134

W

- Weight loss,
effects of, adipose and liver expression of interleukin-1 family members in morbid obesity and, 840
impact of increased levels of calprotectin in obesity and the relation to macrophage content and, 1157
- Wilms tumor suppressor gene, regulation of genetic programming of, by aryl hydrocarbon receptor, during murine nephrogenesis, 1275
- Wistar-Kyoto rats, melioration of crescentic glomerulonephritis by a superagonistic monoclonal antibody for CD 28 in, 686
- WT1, see Wilms tumor suppressor gene

Z

- ZAP70, see Zeta-associated protein kinase-70
- Zeta-associated protein kinase-70, expression of, by B-cell subsets in joint compartments of seropositive and seronegative rheumatoid arthritis and no-rheumatoid arthritis arthritides, 901
